B. Processing of personal data

You can use our recruiting job portal purely for informational purposes, but you can also register on our recruiting platform to receive job offers and to apply for vacancies at Volkswagen AG and the Group companies listed.

1. Processing of log files when visiting our website

When you visit our website, we process the following information:

- the date and time of your visit
- the pages you visited on our website
- the website from which you came to us

We process this data for the following purposes:

- perform analytics to improve our recruiting process, such as conversion rates or drop-off points in the application process
- derivation of key figures to optimise our recruiting strategy
- The stored log data helps analyse an fix errors to improve the usability and performance of the application.

The evaluation is carried out on the basis of aggregated figures as a statistical evaluation, without drawing any conclusions about the individual persons.

The log data is stored in connection with the active candidate profile. For further information on data deletion and the corresponding options, we refer you to Chapter 7. “Data Deletion”.

2. Further use of the job portal, in particular for the purpose of job search

2.1. Registration & Profile Visibility

You have the option of registering under "View profile" and creating an individual candidate profile. Once you have registered, your registration data will be transferred directly to this profile and will be considered as application data when your candidate profile is further processed. This means that you no longer have to enter this data separately.

You can provide further information in your individual candidate profile. Mandatory fields are marked as such by a red asterisk. In optional fields without a red asterisk, you can provide further voluntary information. Furthermore, you have the option of uploading documents in your individual candidate profile.

The relevant personal data processed in your candidate profile include:

- Your registration data (surname, first name, country/region of residence, e-mail address and password) will be collected for the purpose of providing you with the access data for our job portal.
- Master data/personal information (e.g. title, private contact details, etc.)
- Application data (e.g. curriculum vitae, certificates, highest qualifications, etc.)
- Your profile visibility information
- Correspondence with you in the context of your shared candidate profile
- Talent pool membership and connected email campaigns

On the one hand, you have the option of making your candidate profile visible exclusively in the context of specific applications. This means that your candidate profile can only be viewed by the recruiters or recruiting teams of the jobs you are applying for. In such case, the privacy policy of the company you are applying for (as displayed in the vacancy) will apply in detriment of the present policy. Data from your submitted applications (e.g. cover letter, information on possible severe disability/equality) are always only visible to the recruiter(s) processing.

On the other hand, you have the option of making your candidate profile visible to recruiters of the Group companies listed in Section A ("Controllers") nationally (in relation to the country/region of your current residence) or worldwide. In such case, this privacy policy shall apply and your candidate profile may be considered by the respective recruiters regardless of an application for positions where your candidate profile fits. In this case, they would contact you without obligation, e.g. with an invitation by e-mail to apply for this position.

You can change your profile visibility setting at any time.

Your data is transmitted in encrypted form.

2.2. Talent Pool & Job Notifications

Furthermore, you have the opportunity to be included in the Talent Pool by activating this option during registration / in your candidate profile in the "Update Preferences" section. This means that the respective recruiters, who will be able to view your profile according to your selection (see section 2.1), will be able to suggest you positions that are a particularly good fit for your profile. In this case, you might be contacted by the Group company, e.g. with an invitation to apply for a vacancy.

When registering, you have the option to activate job notifications. A job notification informs you by email when new jobs are posted that match the filter criteria you previously set in the job search or have similar criteria to the job for which you have enabled the job notification. All active job notifications will be listed in your candidate profile under "Manage Job Alerts". You can also deactivate the job notifications at this point in the candidate profile.

2.3. Further processing of your data in the recruitment process

In the event of hiring, your existing data and documents from your candidate profile and your application will be transferred to our HR master data systems for the subsequent onboarding and hiring process.

In addition, your existing candidate profile with the existing personal data and documents will be transferred to an internal candidate profile in the same way as the stored profile visibility settings. All transferred data and visibility settings can be adjusted by you at any time.

3. Is there an obligation to provide personal data?

The provision of your data is not mandatory. The provision of your data is neither legally nor contractually required. However, if you would like to apply for a specific position via our job portal, it is necessary for your data to be made available so that Volkswagen AG or the Group company advertising the job can decide on your application – and thus ultimately on your hiring. Please note the further information in the respective job advertisement.

The use of the aforementioned functionalities (profile visibility, job notifications, talent pool) is voluntary, but the provision of your data is necessary for the use of these functionalities.

4. On what legal basis do we process your data?
