

Position Description

Position title:	Senior Project Delivery Lead
Reports to:	Team Leader Urban / Rural
Business unit:	Network Services
Employment category:	Enterprise Agreement (Pay Point 17-21) / Contract

About CitiPower and Powercor

As electricity distribution companies we provide safe, reliable and affordable power to 1.9 million Victorian customers. We use our network of poles, wires and infrastructure to bring power to homes and businesses across almost 65% of Victoria — that’s more than 120,000 kilometres of wires and 850,000 poles.

But we do so much more than manage poles and wires. We’re also the gateway to a clean energy future, dedicated to finding solutions and harnessing new technology to benefit our customers, communities and the environment. This includes industry leading projects in community batteries, demand management, smart charging for electric vehicles (EVs) and microgrids.

And as more customers choose solar, batteries, EVs and smart appliances — the electricity system is becoming increasingly complex, and so too is the level of innovation required to manage it.

About the Network Services team you’ll be part of

Network Services is a 24x7 operation, constructing and maintaining electrical infrastructure and responding to faults and emergencies throughout the CitiPower and Powercor electricity distribution networks. The team is responsible for design, project management, workforce management, field construction and supply chain and logistics management. Functional teams include network control and operations, major projects, maintenance, field services, design and customer programs and works delivery management.

Our core values

Live safely

Improve our business

Be customer and community minded

Be the best you can be

Succeed together

Purpose of the position

To deliver complex Customer Initiated Augmentation Works projects that comply with business and regulatory requirements. Negotiate outcomes that meet the needs of the customer and the business.

Your key responsibilities

Customer and Stakeholder Management

- Develop and maintain customer relationships to ensure successful delivery of all Customer Initiated Augmentation Works (CIAW) projects ensuring compliance with business and regulatory requirements
- Negotiate outcomes with customers to ensure customer requirements are met whilst ensuring network capacity, safety and commercial factors
- Manage internal stakeholders expectations through ensuring all aspects of project delivery are clearly communicated in a timely manner
- Ensure project risks are communicated and actioned to reduce the any impact to project delivery timelines
- Liaise/negotiate with external stakeholders (local councils, service providers and the wider community) to achieve business and customer objectives

Project Deliver

- Manage the delivery of complex Customer projects to ensure all project targets are achieved on time, to budget, in accordance with quality and HS&E obligations
- Ensure any project risks (both financial and delivery time) and variations are managed and ensure corrective action is taken to address any project risks or overruns
- Report and assist in the investigation of HS&E matters in relation to projects
- Prepare appropriate documentation to ensure A to P approval for customer projects is received without additional rework
- Review and provide advice / support on plans of subdivisions as required
- Ensure all contractors and contractor activities comply with legislative, regulatory, HS&E and contractual obligations

Technical Advise

- Ensure that the AER guidelines and internal requirements are adhered to and rectify any non compliance
- Be a point of contact to provide technical advice projects to internal and external stakeholders on large scale Customer initiated projects
- Manage the preparation and delivery of project scoping, concept and detailed design documentation in accordance with process as required. Ensure that the design production complies with established QA processes.

Scope Development and Cost Estimates

- Assess customer electrical load requirements and identify and communicate the impact on both distribution networks
- Consult with internal and external stakeholders to determine the Least Cost Technically Acceptable (LCTA) option to meet customer needs.
- Manage the preparation of project costings and segmentation of project work into specific project activities to comply with Network Customer Policy
- Provide advice to internal and external stakeholders on customer requirements and contractual obligations and or conditions

What you'll bring to the business

Education / Qualifications:

- Certificate IV ESI Power Systems/Associate Diploma of Electrical Engineering or Project Management qualification or equivalent tertiary qualification.

Knowledge:

- Strong knowledge of the Electricity Distribution industry
- Ability to negotiate positive outcomes for the business and customers
- Ability to deliver high volume, complex projects
- Ability to use computer-based information systems and applications
- Ability to deliver programs of projects as required.
- Knowledge and understanding of VESI design, CitiPower and Powercor Technical Standards and construction practices.
- An ability to establish good working relationships with developers, architects, electrical contractors, builders and consultants

Experience:

- Strong understanding of the CIAW, Electricity Supply Policy and associated codes
- Electrical industry experience such as field experience or proven experience in complex electrical network extension projects
- Experience in applying Project Management or Program Management principles
- Demonstrate leadership experience relating to Health, Safety and Environment Policies and Standards
