

Position Description

Position title:	Project Manager - Transmission
Reports to:	Project Director - Transmission
Business unit:	Network Services
Employment category:	Contract (Employment Agreement)

About CitiPower and Powercor

As electricity distribution companies we provide safe, reliable and affordable power to 1.9 million Victorian customers. We use our network of poles, wires and infrastructure to bring power to homes and businesses across almost 65% of Victoria — that’s more than 120,000 kilometres of wires and 850,000 poles.

But we do so much more than manage poles and wires. We’re also the gateway to a clean energy future, dedicated to finding solutions and harnessing new technology to benefit our customers, communities and the environment. This includes industry leading projects in community batteries, demand management, smart charging for electric vehicles (EVs) and microgrids.

And as more customers choose solar, batteries, EVs and smart appliances — the electricity system is becoming increasingly complex, and so too is the level of innovation required to manage it.

About the Network Services team you’ll be part of

Network Services is a 24x7 operation, constructing and maintaining electrical infrastructure and responding to faults and emergencies at all hours throughout the CitiPower and Powercor electricity distribution networks. The team is responsible for design, project management, workforce management, field construction and supply chain and logistics management. Functional teams include network control and operations, major projects, maintenance, field services, design and customer programs and works delivery management.

Our core values

Live safely

Improve our business

Be customer and community minded

Be the best you can be

Succeed together

Purpose of the position

The Project Manager, Major Projects role is responsible for delivering defined projects for Electricity Networks (EN) in line with all health and safety, quality, and governance requirements. This position plays a key role in supporting major transmission-related projects, ensuring they are executed effectively and in accordance with organisational standards.

The role is also accountable for delivering projects in alignment with the PMBOK (Project Management Body of Knowledge) framework, ensuring structured, consistent, and disciplined project management practices across the transmission portfolio.

Your key responsibilities

Manage Major Projects

- Management and Leadership of major projects to achieve on time, budget, quality, OH&S, environmental standards and ensuring customer and related financial and governance requirements.
- Management and Leadership of the delivery of major projects and services including managing internal and sub-contract resources.
- Provide effective project management ensuring the desired outcomes of the projects are delivered in accordance with the project scope of works.
- Preparation, evaluation and issue of tenders for construction, major plant and/or materials.
- Management of contract processes associated with major projects.
- Proactive and effective reporting on project performance including actions to ensure objectives and targets are achieved and communicated.
- Financial management including specific cost control, variation management, accurate month end reporting and project forecasting.
- Implementation of Risk Management initiatives to identify, manage and control project related issues.
- Commitment to the Leadership Development Program

Develop & Maintain Customer Relationships (including Customer Offers where applicable)

- Management of the relationship with the Customer and Electricity Network Groups to ensure all stakeholder requirements are met.
- Liaise with the Customer and Electricity Network Groups and representatives on all aspects of the major projects throughout the project life cycle.
- Develop and manage effective customer relationships with key internal and external stakeholders.
- Pro-actively identify and implement improvement opportunities.
- Facilitate any conflict to a resolution in a timely manner to achieve an outcome that mutually benefits all stakeholders.
- When undertaking end-to-end customer projects, ensure the Customers offer is issued in accordance with system & asset requirements, ESC & Customer expectations

Scope Development, Clarification, Negotiation and Quote Preparation

- When undertaking end-to-end customer projects, liaise with other Network groups to ensure system capacity is available to meet customer needs.
- Assist in the preparation and review of conceptual and final project scopes associated with major projects.
- Ensure during the scope development phase the objectives, assumptions, constraints & preliminary risk assessments are confirmed.
- Conformance to client requirements and contractual conditions.
- Project acceptance by the client throughout the project lifecycle.
- Management of the tender/approval and/or contract signing for contract works.
- Management of projects through the full approval life cycle in line with the governance process.

Project Management Systems

- Develop and improve project management systems and implement in all business operations by capturing learnings and identifying opportunities.
- Provide guidance, training and education on all aspects of project management.
- Effective use of Project Management Systems and Tools.

Resource Management

- Ensure that all work activities are undertaken in accordance with Regulatory policies, work practices, processes and standards.
- Ensure all contractors and contractor activities comply with legislative, regulatory and contractual obligations.
- Implement safe working cultures at all levels and ensure all health and safety policies, procedures and practices are adhered to at all times.
- Ensure all work activities and projects undertaken are focused on ensuring Network reliability and all quality and environmental requirements are achieved.
- Ensure all works are undertaken in the most efficient and cost-effective manner.

What you'll bring to the business

Education / Qualifications:

- A Tertiary Qualification in an Engineering or associated area/ discipline

Knowledge:

- The role requires a detailed knowledge of the concepts and principles of project management.
- Detailed knowledge and experience in the concepts and principles of people management.
- Detailed knowledge of the electricity distribution, sub-transmission, transmission and/or infrastructure industry with a working knowledge of Powercor/CitiPower technical standards, construction practices and estimating work methodologies.
- Proven ability to apply project management principles in an electrical distribution and sub-transmission environment.
- Proven ability in SAP and other project management, estimating and/or management tools.
- Detailed knowledge and understanding of Financial Management, project governance, forecasting and reporting.
- The ability to identify the project schedule of works during the planning stages to assess the risks, opportunities, resource requirements, major plant items, materials and construction work practices and methodologies.
- Demonstrable practical application of construction methodology and integration of this into the planning phases of the project.

Experience:

- Ability to achieve Accreditation as a CPPM with the Australian Institute of Project Management: and/or
- At least 5 years' experience working with Project Management principles and Project Delivery Methodology in the electrical distribution and sub-transmission areas
